

Hesamaldin Gol

Full-Stack Developer

Michigan, USA

www.hegolz.com hegolz.dev@gmail.com github.com/hesam-23

Professional Summary

Junior Full-Stack Developer focused on building secure and functional web applications using JavaScript, Node.js, and Express. Coming from an engineering background with leadership experience, I approach problems in a structured and responsible way. I am self-taught, actively building projects, and looking for a junior role where I can contribute immediately and grow through real-world experience.

Skills

- > Frontend: HTML5, CSS3, JavaScript (ES6+), DOM Manipulation, Responsive Design
- > Backend: Node.js, Express.js, RESTful APIs, Session-based Authentication, SQLite
- > Security: Input Validation, XSS Protection (using sanitize-html), Rate Limiting
- > UX/UI: Dashboard Design, Authentication Flows, Responsive Layouts, Interactive Components, Dark Mode
- > Data Visualization: Chart.js
- > Tools & Design: Git, GitHub, Figma, Adobe Photoshop, Netlify, Domain & Hosting
- > Concepts: Full-Stack Architecture, CRUD Systems, REST API Integration, Client-side State Management

Projects

> Comment & Admin Dashboard :

Full comment management system with admin panel, moderation workflow, rate limiting, and input sanitization.

> Full-Stack Authentication System:

Secure login system with password hashing, session-based auth, and API integration.

> Interactive Dashboard & Statistics Panel:

Responsive dashboard with dynamic charts, dark mode, and real-time data filtering.
